

HOSPITAL MANAGEMENT SYSTEM USING PYTHON

A MINI PROJECT

Prepared By:

Medhini Peddapalli

Branch: AI & DS

Year: 2023–2027

Abstract:

The Hospital Management System is a simple Python project designed to manage hospital activities efficiently. It helps store patient information, doctor details, appointments, and billing records. This system reduces manual work and improves hospital management.

Introduction

Hospitals handle many patients every day. Managing records manually takes more time and may lead to errors.

This system helps to:

- Manage patient records
- Store doctor information
- Reduce paperwork
- Save time

Objectives:

- Add Patient Details
- View Patient Records
- Update Patient Information
- Delete Records
- Manage Doctor Details
- Generate Billing Information

Software Requirements:

Hardware:

- Computer or Laptop
- 4 GB RAM

Software:

- Python 3
- VS Code / IDLE

Python Concepts Used:

- Variables
- Dictionaries
- Lists
- Loops
- Functions
- If-Else Statements
- Input Function

Working of Project:

1. User enters patient details.
2. System stores the information.
3. User can view records.
4. Records can be updated.
5. Records can be deleted.
6. Billing information is generated.
7. User exits the system.

Source Code:

```
patient = {}
```

```
name = input("Enter Patient Name: ")
```

```
age = int(input("Enter Age: "))
```

```
disease = input("Enter Disease: ")
```

```
patient["Name"] = name
```

```
patient["Name"] = name  
patient["Age"] = age  
patient["Disease"] = disease  
  
print(patient)
```

Sample Output:

Enter Patient Name: Ramesh

Enter Age: 25

Enter Disease: Fever

```
{'Name': 'Ramesh', 'Age': 25, 'Disease': 'Fever'}
```

Advantages:

- Easy record management
- Saves time
- Reduces paperwork
- Improves accuracy
- User friendly

Limitations:

- No database
- No graphical interface
- Single user system

Conclusion:

The Hospital Management System is a useful Python project that helps manage patient records efficiently. It reduces manual work and improves hospital operations.

THANK YOU
